

1:144 HESTON PASSENGER STEPS

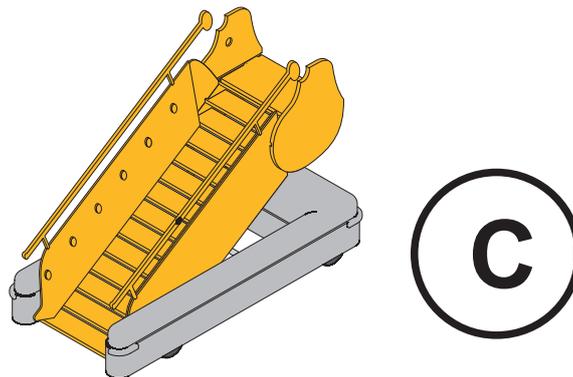

2011 © Aircraft In Miniature Limited

These are a larger version of the instructions printed inside the header of each kit, plus some more detailed written instructions (shown in blue).

- 1 Remove all burrs from cast metal and brass parts.
- 2 Prime and fill any sink marks in the cast base.
- 3 Fold the sides of the main step structure up, then fold each step to the required angle (See sketch A).
Note - there are fold lines etched on the inside of each fold.
- 4 Fold the lugs on the sides of the top platform down (See sketch A).

- 5 Attach the top platform to the upper step (See sketch B).
- 6 Attach the side panels (with and rails) to the sides of the main structure (the etched lights fit into holes in the side panels) (See sketch B).
- 7 Attach the top side panes to the lugs on the sides of the top platform (See sketch B).

- 8 Attach the assembled steps to the cast metal base (See sketch C)
- 9 Check www.aim72.co.uk for self-print decals to down load.
- 10 Paint the model.

Note - there are some very small detail parts on the etched fret which are impractical to use in this scale.
